

Download DBeaver : <https://dbeaver.io/>

Download latest club public database : <http://prompts.aidg.club/backup.db>

Go to <https://github.com/NeoClubAIDS/AIDSPrompts/tree/main/db> and grab aiprompts.sql to install the structure of the database (PHPmyadmin or other.)

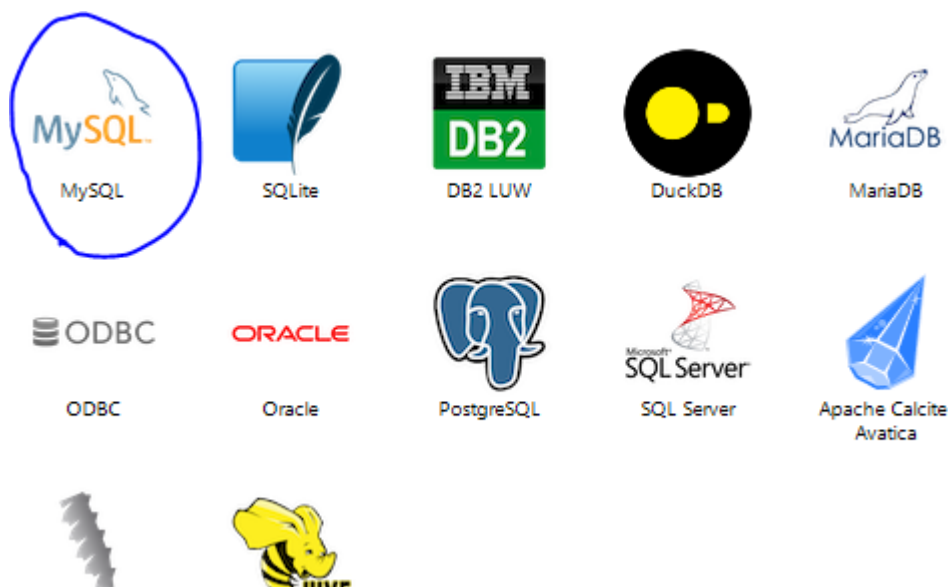

Open DBeaver

New Connection :

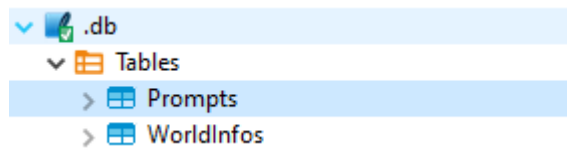

Then choose the old database.

Do another for the MySQL Database :

And register your new database.

Go to Prompt in the old database :

Export Data -> Database

▼ Prompts	prompts	existing	
123 Id	Id	existing	
ABC AuthorsNote	AuthorsNote	existing	
ABC Description	Description	existing	
ABC Memory	Memory	existing	
123 Nsfw	Nsfw	existing	
123 ParentId	ParentID	existing	
ABC PromptContent	PromptContent	existing	
ABC PublishDate	PublishDate	existing	
ABC Quests	Quests	existing	
ABC Tags	Tags	existing	
ABC Title	Title	existing	
ScriptZip	ScriptZip	existing	
ABC NovelAiScenario	NovelAIScenario	existing	
ABC HoloAiScenario	HoloAIScenario	existing	
123 CorrelationId	CorrelationID	existing	
ABC DateCreated	DateCreated	existing	
ABC DateEdited	DateEdited	existing	

In target choose prompts on the new database.

Then press Next until it's over.

Do the same for WorldInfos but be sure Keys match WKeys (MySQL didn't want the name Keys for the column)

▼ WorldInfos	worldinfos	existing	
123 Id	Id	existing	
ABC Entry	Entry	existing	
ABC Keys	WKeys	existing	
123 PromptId	PromptId	existing	
123 CorrelationId	CorrelationId	existing	
ABC DateCreated	DateCreated	existing	
ABC DateEdited	DateEdited	existing	

On your new database do :

```
UPDATE `prompts` SET `PublishDate`='2020/11/15' WHERE `Id`< 1000 and `PublishDate` is null;
```
